

## PLAN FOR IMPACTFUL SAFETY OBSERVATIONS

### Are your observations making an impact?

Before you begin, be sure you follow the P.L.A.N. for safety observations!

**Prepare** before starting. Who will be observed? What are you looking for? When? What type of observation is needed? What are safe behaviors for this job?

**Note** the results for feedback!

Reinforce safe behaviors, review those that weren't. Ask why to gain insight and motivation. Then, focus on new behaviors.

**Learn** what's necessary for observation success.

Ensure supervisor is ready to conduct the observation – with training, task checklists, advice, and guidance.

**Act** by conducting the observation. Once you've prepared, it's time to complete the task at hand.
